Opening a store in Kuala Lumpur, Malaysia

BUSINESS PROBLEM

- Location of the shopping mall is one of the most important decisions that will determine whether the mall will be a success or a failure
- Objective: To analyse and select the best locations in the city of Kuala Lumpur, Malaysia to open a new shopping mall
- This project is timely as the city is currently suffering from oversupply of shopping malls
- Business question

OIn the city of Kuala Lumpur, Malaysia, if a property developer is looking to open a new shopping mall, where would you recommend that they open it?

DATA

Data required

- OList of neighbourhoods in Kuala Lumpur
- OLatitude and longitude coordinates of the neighbourhoods

OVenue data, particularly data related to shopping malls

Sources of data

OWikipedia page for neighbourhoods

OGeocoder package for latitude and longitude coordinates

OFoursquare API for venue data

(https://en.wikipedia.org/wiki/Category:Suburbs in Kuala Lumpur)

METHODOLOGY

- Web scraping Wikipedia page for neighbourhoods list
- Get latitude and longitude coordinates using Geocoder
- Use Foursquare API to get venue data
- Group data by neighbourhood and taking the mean of the frequency of occurrence of each venue category
- Filter venue category by Shopping Mall

- Perform clustering on the data by using k-means clustering
- Visualize the clusters in a map using Folium

RESULTS

• Categorized the neighbourhoods into 3 clusters •

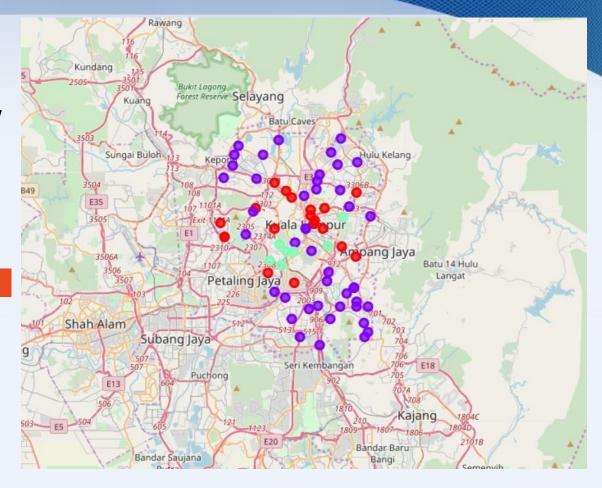

OCluster 0: Neighbourhoods with moderate number of shopping malls

OCluster 1: Neighbourhoods with low number to no existence of shopping malls

OCluster 2: Neighbourhoods with high concentration of shopping malls

DISCUSSION

- Most of the shopping malls are concentrated in the central area of the city
- Highest number in cluster 2 and moderate number in cluster 0
- Cluster 1 has very low number to no shopping mall in the neighbourhoods
- Oversupply of shopping malls mostly happened in the central area of the city, with the suburb area still have very few shopping malls

RECOMMENDATIONS

- Open new shopping malls in neighbourhoods in cluster 1 with little to no competition
- Can also open in neighbourhoods in cluster 0 with moderate competition if have unique selling propositions to stand out from the competition
- Avoid neighbourhoods in cluster 2, already high concentration of shopping malls and intense competition

CONCLUSION

- Answer to business question: The neighbourhoods in cluster 1 are the most preferred locations to open a new shopping mall
- Findings of this project will help the relevant stakeholders to capitalize on the opportunities on high potential locations while avoiding overcrowded areas in their decisions to open a new shopping mall

Thank you!
